DECEM FOUR

IN ONE BIN

DECEM Four was developed to make waste separation simple, efficient, and space-saving. With up to four fractions collected in one bin, households can sort waste directly at the source while reducing residual waste and improving recycling rates. The flexible interior system allows easy adaptation to local collection needs, making DECEM Four an ideal solution for modern and sustainable waste management.

- 1 I Frame

2 Divider Wall

3 Additional 4F Bins
- A Holds additional 4F bins
Fixed with 8–10 screws (M5x15)
Easy assembly and disassembly

B 2 positions for 370 L (50/50 or 40/60)

C Available sizes for 370
20 L Vertical
20 L Horizontal
30 L Vertical
30 L Horizontal
45 L
60 L (only Division 60)
80 L (only Division 60)

**MORE RECYCLABLES,
LESS SPACE REQUIRED**

Four Fractions in a single bin eliminate the need for multiple individual bins, saving valuable space.

Fewer bins, reduced effort in handling, cleaning, and administration

Bundled collection, multiple fractions captured in a single process,
more efficient workflows

Optimized logistics, lower time and cost requirements for routes and
planning, reduced driving distances and CO2 emissions in operation

Flexible partitioning, demand oriented use of volumes

Compact design,
reduced floor space
requirements,
ensuring a tidier
environment
